Techo-Bloc Colors

Color

Techo-Bloc's signature pallet of natural hues creates beauty that is more than skin deep. Pigments are blended right into the mix, making pavements brilliant throughout, not just near the surface. Choose a solid color, or create a diversified look with a blend. Techo-Bloc uses thermodynamically stable iron-oxide pigments, so the color of each individual unit will not fade or wear off when exposed to the elements.

Color Variation

Comprised of natural ingredients, pavement units vary slightly in color batch depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match.

Efflorescence

Efflorescence is a natural phenomenon that appears in the form of white powdery film on the pavement surface. Consisting of mostly calcium carbonate, it does not affect the structural integrity of the pavement. Although efflorescence cannot be prevented, it will disappear over time or it can be cleaned with an efflorescence cleaner.

Laying Techniques

Proper installation enhances the overall color of pavement. Pavement units should be selected from at least two pallets and then randomly mixed. This creates an attractive and subtle blending of color.

Techo-Spec Pavers

All interlocking pavers manufactured by Techo-Bloc follow strict regulations in their components, being sand, stone, cement and color. They are all vigorously tested for maximum quality control. Techo-Bloc pavers are manufactured with zero slump concrete and cured in a controlled environment. All pavers must meet the following norms ASTM-C936, CSA (A231.2-M95) and the NQ.2624-120/87 which are recognized as the strictest in the world.

	ASTM-C936	Techo-Bloc
Compressive strength	8000 psi at 28 days	minimum 9000 psi at 28 days
Durability to freeze thaw cycles	total mass loss no greater than 1%	total mass loss no greater than 1%
Absorption	lower than 5%	lower than 3 %
Dimension tolerance of the paver norm	+/- 3 mm	+/-3 mm
Other surfaces	-1 mm to +3 mm	-1 mm to +2 mm

All pavers manufactured by Techo-Bloc meet the ASTM-C936 norm.

Techo-Bloc Colors

sandlewood	Mix of tan and charcoal
tan	Tan
earth brown	Mix of brown and earth tones
shale grey	Mix of grey and charcoal
