## ECOMELT ICE MELTER

EcoMelt™ Ice Melter is the newest product in the Tillson Brands family of “right choice” ice melters. This new bio based technology is the most advanced additive derived from 100% totally renewable resources. It starts as a co-product from the corn ethanol industry, then processed chemically refining the organic salts, polyols and dissolved proteins and sugars. The liquid form can be used as a deicer, but when it encapsulates a chloride, it lowers the eutectic point as well as contributing as an all natural corrosion inhibitor.

- over 71% less corrosive than salt
- effective to -30c
- all natural corrosion inhibitor
- all natural anti-caking agent
- made with 100% renewable resource
- contains no Magnesium or CMA

TB-ECO-MELT227KG

22.7kg Bag
